

1784. Check if Binary String Has at Most One Segment of Ones

Difficulty: Easy

Link: <https://leetcode.com/problems/check-if-binary-string-has-at-most-one-segment-of-ones/?envType=daily-question&envId=2026-03-06>

Generated at: 2026-03-06 13:30:41

Problem:

Given a binary string `s` **without leading zeros**, return `true` if `s` contains **at most one contiguous segment of ones**. Otherwise, return `false`.

Example 1:

Input: `s = "1001"`

Output: `false`

Explanation: The ones do not form a contiguous segment.

Example 2:

Input: `s = "110"`

Output: `true`

Constraints:

- `1 <= s.length <= 100`
- `s[i]` is either `'0'` or `'1'` .
- `s[0]` is `'1'` .
