Generated at: 2026-06-19 13:26:02

Problem:

Given two numbers, `hour` and `minutes`, return *the smaller angle (in degrees) formed between the `hour` and the `minute` hand.*

Answers within `$10^{-5}$` of the actual value will be accepted as correct.

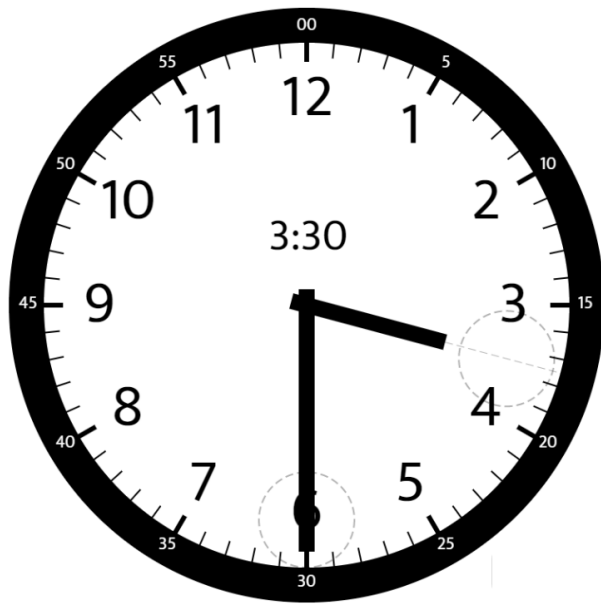

Example 1:

Input: hour = 12, minutes = 30

Output: 165

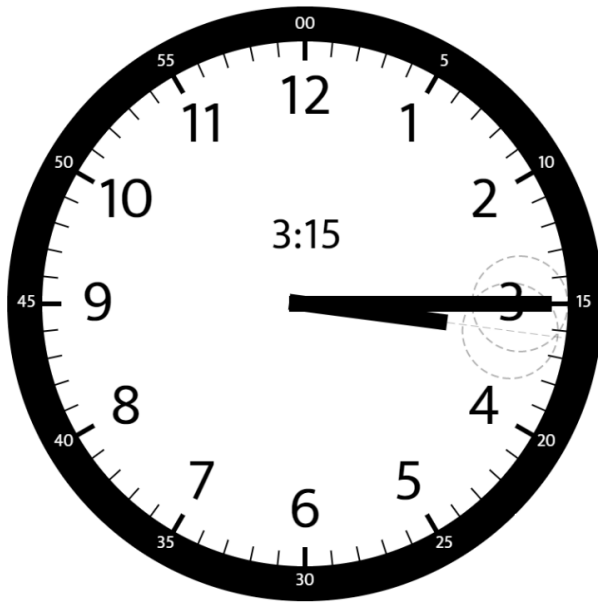

Example 2:

Input: hour = 3, minutes = 30

Output: 75

Example 3:

Input: hour = 3, minutes = 15

Output: 7.5

Constraints:

- $1 \leq \text{hour} \leq 12$
- $0 \leq \text{minutes} \leq 59$
